News Update

July 2011

TV120 CYCLONE 2-Motor Vacuum
High performance dust control vacuum that can also be used for wet pick up. Featuring four stages of filtration for effective dust control and maximum motor protection. Initial separation of larger debris, then cyclonic filtration of the finest dust, then a reusable dust bag and finally a cartridge filter. If required a "H" rated filter can be fitted. The TV120 Cyclone is supplied complete with hose and a comprehensive tool kit.

A very high specification at a very keen price
Only £479

Screed Sledge
24" and 30" Widths

For efficient laying of resin mortars. The screed sledge will help you to lay consistent floors with greatly reduced physical effort.

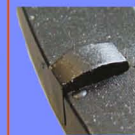

Available from stock for next day delivery.

From £216

Ø180mm PCD Disc

£120
Ten PCD tips / disc

Ideal for the removal of latex, adhesives and most thick coatings. Very fast removal rate.

Also available as bolt on segments for floor grinders

PLANET DUAL BAG 3+3
NON-STOP suction for NON-STOP production

New

A brand new concept in industrial dust control— a dust control vacuum with the potential to operate 24/7 without a drop in performance.

Filter cleaning is fully automatic without having to stop the unit. Filter cleaning is extremely effective and does not rely on a compressor or complex electronics.

“LONGOPAC®” dust collection allows the bags to be changed/emptied without the need to stop the vacuum.

Both the above ensure continuous output whether grinding, planing or blasting.

The unit is available with either 3kw or 5.5kw motors giving an airflow of 640m³/h and 1120m³/h. The Planet Dual can be fitted with Hepa filters if required.

A MAXI Version is available with even bigger filter surface area for extended operating time.

Overall height of the vacuum can be reduced to 180cm for transportation. Operating height is 200cm. Total weight is 220kg for the 3+3kw unit.

Soroto - Mixer Paddles

New conical design delivers 15-20% increased efficiency
 The conical design follows the angled sides of the mixing tub or bucket allowing the mixer drill and paddle to remain upright yet still able to scrape the sides clean for a more thorough mix.

The unique top ring prevents the paddle from digging in and wearing away the mixing tub.

Tornado “Dust Free” Cutting Cowl

Universal fitting for most popular 125mm grinders. Supplied complete with dust collection bag for 90% efficiency without a vacuum or connect to a suitable vacuum for close to 100% dust free operation. Foot plate included for stable accurate cuts, also ideal for plunge cutting. Maximum depth of cut 33mm

New

Only £49

Hurricane “Dust Free” Grinding Cowl

Universal fitting for most popular 100—125mm grinders. Close to 100% dust free when connected to a suitable vacuum. Removable front section for grinding up to a wall. Flexible mounting system allows a natural grinding action. Brush skirt is effective on most surfaces and is easy to replace when worn. Leaves the work piece surface free of dust. Videos can be viewed on our web site: www.pwm-sales.co.uk
